IDENTIFIERS	*Coconino Community College AZ

ABSTRACT

This report details the development of a student outcomes assessment of general education by faculty members at Coconino Community College (CCC) (Arizona). This assessment project consisted of three major components: (1) The General Education Assessment Pilot Project (Faculty members dedicated a semester to measuring student achievement of course outcomes and explored cost-effective and meaningful methods for reporting and documenting student academic achievement--the primary focus was to look for commonality in course-level assessment of student outcomes); (2) Writing Student Outcomes for the General Education Core Curriculum, wherein a group of faculty and administrators worked carefully to link student outcomes to the college mission, purpose statement, and general education values and criteria; and (3) The Teaching and Learning Conference, for which a two-day conference was organized to provide professional development opportunities to faculty and staff. The conference included work sessions focused on assessment techniques and writing outcomes, as well as other training opportunities for improving teaching and learning. Information about these three components of the assessment project, as well as a compilation of the results of four semesters of general education assessment (fall 1999 to spring 2001), are reported in chronological order in this report. (Includes 11 addendum exhibits.) (KP)

ASSESSMENT OF GENERAL EDUCATION

2000-2001

A Faculty Report on:

ASSESSMENT OF GENERAL EDUCATION AT COCONINO COMMUNITY COLLEGE

2000-2001

Submitted by Barbara Eickmeyer
Assessment Project Leader
May 2, 2001

PURPOSE AND OVERVIEW OF THE PROJECT

In the spring semester of 2000, the Vice President for Academic Affairs approved the continuation of the General Education Assessment proposal made by full-time faculty member, Barbara Eickmeyer. The Self Study steering committee had endorsed the proposal in December, 1999, and identified it as a "high priority" for the institution. Financial support was allocated from the budget for the Principal Committee for Institutional Effectiveness (PIE). Goals for the proposal included:

The General Education Assessment Pilot Project. Full-time and associate faculty would dedicate one more semester to measuring student achievement of course outcomes and exploring cost-effective and meaningful methods for reporting and documenting student academic achievement at Coconino Community College (CCC). The primary focus of this final semester was to look for commonality in course-level assessment of student outcomes. The study would focus on assessment tools as well as reporting student achievement of outcomes.

Writing Student Outcomes for the General Education Core Curriculum. The assessment project leader (Eickmeyer) would facilitate completion of the student outcomes for General Education completers. The process would be complete by end of fall semester and a curriculum revision would take place in the spring 2001 semester.

Raising Awareness of Assessment of Student Academic Achievement and Professional Development / Training of Faculty. It had become evident throughout the 1999-2000 phase of this project that a strong need existed for faculty training in assessment. An innovative and collaborative effort between the assessment project leader and Jim Rhodes, Director for the Training and Development Center, resulted in a proposal for CCC's first (annual) *Teaching and Learning Conference.* The conference would serve as a conduit for assessment training workshops for faculty and staff, as well as a platform for implementation of the Title III Grant theme to "train the trainer." The conference would be held in August, 2000.

A final meeting was convened with the Vice President for Academic Affairs and the three faculty coordinators for the General Education assessment project in May, 2000. His recommendations for priority in the 2000-2001 academic year included: finalizing the General Education Student Outcomes, determining appropriate measurement tools, and writing outcomes for programs other than General Education.

These activities are reported in chronological order and reflect the results from assessment efforts and activities in the *Teaching and Learning Conference*, the assessment pilot project, the writing of the General Education Student Outcomes and a compilation of four semesters in assessment (fall 1999 to spring 2001).

WHAT WE DID SUMMER 2000

Pilot project continued. A small group of associate faculty completed outcomes assessment reporting on their general education courses. These results can be found in the Addendum.

Writing General Education Student Outcomes. During the spring 2000 semester, a group of 15 faculty and 3 administrators had worked carefully to link student outcomes to the college mission, purpose statement, and general education values and criteria. At the final College Instructional Team (faculty) meeting in April, 2000, the faculty selected representatives to continue this important process during the summer. Seven full-time faculty met in early August to continue the refining process on the General Education Student Outcomes. The results were disseminated to faculty at the beginning of the fall semester.

Teaching and Learning Conference. A collaborative effort among the college President, the Public Relations Office, the Coordinator of Professional Development (Title III Grant), and the Assessment Project Leader resulted in the college's first annual *Teaching and Learning Conference*. This was a two-day conference prior to the start of the semester, dedicated to providing professional development opportunities to faculty and staff. There were about twenty work sessions on assessment techniques and writing outcomes, as well as other training opportunities for improving teaching and learning. Participants deemed the conference a success and expressed their appreciation and satisfaction in a post-conference survey. Immediately following the *Teaching and Learning Conference*, the Coordinator of Professional Development and the Assessment Project Leader suggested that some of the work sessions from the conference could be repeated during the academic year as a method for providing training opportunities for faculty and staff. The planning committee decided to host a second conference in August 2001.

WHAT WE DID - FALL 2000

Pilot project continued for final semester. This time the primary focus was on assessment measures. Nine associate and six full-time faculty participated in the project. Once again, the project leader and two assistants received a combined total of 13 hours release time, while associate faculty were compensated with a stipend at the end of the semester. Other full-time faculty who participated in the project did not receive additional compensation nor release time; however, they reported positive satisfaction from participating in the project. Since the data collection of student outcomes was in place and reporting was going smoothly, this final semester was dedicated to identify and evaluate the instruments used by faculty in assessing student achievement of outcomes. At the first meeting of the pilot group, the project leaders presented a new assessment form and explained how it would be used in the study (see Tool Survey form in Addendum). The associate faculty who were participating for a second or third time commented that the process seemed more streamlined and easier to do. The participants met three times during the semester and exchanged measuring tool ideas.

An unanticipated result of the pilot project was that as the instructors from various disciplines discussed how they were assessing student outcomes, new ideas for using common tools were brought to the table. For example, an economics instructor collaborated with a geography instructor in an outcomes-linked activity. Students in the geography class received critical information about cost accounting in order to create their capstone project (a pre-feasability study) for the semester. Students in the economics class also received information about writing a pre-feasability study using the skills they acquired in their class. The instructors collaborated in setting up computer software, web links, lecture exchanges, and similar class activities so that students would benefit from both arenas. In one aftemoon of discussing assessment tools, eleven faculty reported that they were "energized and inspired to continue assessing outcomes because the benefits to students were so great."

General Education Student Outcomes. The results of the summer work session on General Education Student Outcomes were distributed to all faculty for input in early September. Twelve full-time faculty, two associate faculty, one staff member, and a division chair participated in two work sessions held in November. This group identified five outcomes areas: communication skills, thinking skills, diversity and global perspective, aesthetic perspective, and ethical and civil values. Within each area, statements of expected student outcomes were written to reflect the college's General Education Core Curriculum.

The General Education student outcomes were finalized by the group during the fall 2000 semester and approved by the CIT in February 2001 (see Addendum).

WHAT WE DID SPRING 2001

Tool Survey results. Paul Holbrook compiled the data gathered from the Tool Survey in the fall 2000 semester of the General Education pilot project. This initial report provided valuable information about how instructor perceptions of assessment measures play a role in outcomes assessment. For example, there were inconsistencies in the reporting of test types. Instructors recorded the use of a "test" and were not specific about the type of test used. This made it difficult to determine the effectiveness of an instrument as compared to another. Many recommendations for future reporting of assessment measures came as a result of the Tool Survey. Results of the Tool Survey are included in the Addendum.

Focus on General Education program review. Upon completion of the General Education student outcomes, the most immediate need was to review the curriculum and course outlines within the general education core curriculum. In anticipation of this process, faculty were asked to set aside a day for curriculum review after spring break. Fourteen full-time, three temporary full-time, four associate faculty, the curriculum coordinator, the advising coordinator and the Dean for the Page campus participated in the six-hour work session that was held on March 23, 2001. Participants reviewed each general education course in their discipline area and identified course outcomes and/or content that supported the General Education Student Outcomes. A complete report of the work session is included in the Addendum.

General Education Student Outcomes and Course matrix. The Assessment Project Leader created a matrix of courses and corresponding General Education Student Outcomes. This chart contains a listing of the General Education Student Outcomes and all the courses in the general education core curriculum and their corresponding outcomes and/or content (see Addendum).

Explored standardized measures for assessing student achievement. As the college faculty finalized the General Education Student Outcomes, it was necessary to investigate commercial tools that might work for standardized assessment purposes. The Project Leader compiled a list of standardized assessment instruments available on the market that could be considered for use by the college. This review also contained basic information regarding cost, impact, and usefulness of the selected instruments under review (see Addendum).

Useful data and experience. The experience gained from the Pilot Project and process of writing the General Education Student Outcomes was vital to other disciplines as area coordinators began to approach the assessment of degrees and certificates.

SUMMARY

This report represents a combined total of more than 1400 hours of dedicated work by college faculty and personnel. The successful completion of the original proposal (fall 1999) for assessment of student academic achievement in General Education could not have been possible without the direct support of the college leaders. The college President and Vice President provided the most critical ingredient in supporting this effort through motivational directives for faculty participation in the process. They demonstrated their commitment to this process by allocating release time and financial resources from hard money budgets. The Dean for the Page Campus provided substantial support from his experience in assessment and supported the effort with regular input. This effort was equally dependent on the generous collaboration and contribution of many full-time and associate faculty who were committed to the idea and worked tirelessly to participate in the process. At times it was difficult to approach them with yet another "thing to do," and yet many were always willing to help out. Paul Holbrook's expertise in using databases and reporting methods was a key component of the project. Above all, this project would not have been steered in the right direction without the extraordinary guidance of Barbara Cress, who demonstrated her measureless commitment to students and the improvement of learning by sharing her knowledge of effective and ethical assessment practices.

CONSIDERATIONS FOR THE FUTURE

Commitment to permanent leadership of student outcomes assessment. In its Addendum to the Handbook of Accreditation, Second Edition, the North Central Association of Colleges and Schools Commission on Institutions of Higher Education (NCA) recommends that an assessment program is making progress in implementation when it "is provided with a Coordinator/Director who reports directly to the CAO" (p. 11, Level Two). Further, an assessment program in the "Maturing Stages of Continuous Improvement" (p. 11, Level Three) demonstrates that "all the structural characteristics described in Level Two are continued, sustained, and where appropriate, enhanced." In anticipation of the NCA visit to Coconino Community College in April, 2002, it is critical that a specific leadership position be established for the coordination of assessment of student academic achievement. It is not

sufficient to delegate the responsibility for assessment to the departmental level of the college. Unless an individual director is responsible for coordinating, collecting, and disseminating assessment of student outcomes data, it is likely that NCA will scrutinize the college's assessment plan with pessimism. This project was the direct result of a three-semester period and was a temporary solution to a permanent need. It was necessary to grant faculty release time in order to conduct the project appropriately, and the results prove the effectiveness of that effort.

Let the public know. Foremost on the list is the implementation of the General Education Student Outcomes into the "woodwork" of the college publications and academic practices. Although this process began during the spring 2001 semester, it is necessary to publicize to students and the college community what to expect from our General Education program.

Find tools. The most important step in the process will be to implement a standardized method for assessing student outcomes. We are committed to adopting the instrument(s) that will best measure the student outcomes identified in our degrees, certificates, and General Education program. This may or may not include a commercial tool. The college faculty will need to explore and evaluate these tools and make a recommendation to college leaders for budgetary commitments. We recommend a pilot for standardized measurement tools in the 2001-2002 academic year, with consideration for multiple measures and capstone courses.

Make a way. It will be necessary to implement a standardized method for assessing students at their entry and exit to the college. It is possible this could be done using commercial instruments that have been used successfully at other colleges of similar demographics and size. Careful consideration needs to be given to the college-wide impact of such a program. The "One-Stop Shop" idea fits in nicely with an entry/exit assessment program, and the data can be used to improve services across programs and curriculum.

Make it pay. The benefits of assessment done right are innumerable. However, the consequences of a fragmented or rushed plan are definite and counterproductive. It is of utmost importance that the college continue to dedicate time and resources to the process of implementing a reasonable and effective student outcomes assessment plan.

Faculty involvement and leadership have driven assessment of student outcomes. We should be proud of the grass-roots efforts that have taken place. At the same time, we should acknowledge the danger of losing the momentum that faculty created. Much has been accomplished, much remains to be done.

Buddy system promoted accessing common outcomes across curriculum.

Outcomes for some courses need to rewritten. What the process for doing this?

Instructors began evaluating the tools they used for effectiveness.

Content of the evaluation instrument was being assessed for validity.

Group exercises were beneficial to students, but harder to track and record individual results.

Form is not specific enough about who is assessed the enrolled student or the student who takes the assessment.

The average score of different methods are detailed in the following table:

Problems	71%
Quiz	81%
Pre/Post test	81%
Instructor test	84%
Debate	89%
Essay	90%
Observation	91%
Oral examination	91%
Matrix	94%
oral presentations	94%
Group activity	96%
Simulation	96%
Verbal response	96%

The average score of assessment by week are detailed in the following table. It should be noted that the material assessed would be progressively more difficult as the semester progresses.

Period	Percent of students who achieved minimun
11	72%
1	75%
14	77%
10	78%
4	80%
8	81%
3	83%
16	83%
5	83%

C. Tool Survey Form

General Education Pilot Project – Fall 2000
Tool Survey

Name_____Course_____Semester/year_____

Assessment Method Codes (A.M.C.)		
CR– Classroom research	ES – Essay/Writing Assignment	EE – External Examiner
GA – Group activity, non-graded	IT – Instructor Developed Test	JO – Journal
OB – Observation	OE – Oral Examination	PE – Peer reviews
PA – Performance Appraisals	PP – Pre/Post test	PR – Problems
SI – Simulation	ST – Standardized test	OT – Other

COURSE OUTCOME MEASURED: _____

METHOD USED FOR MEASURING THIS OUTCOME:_____

ASSESSMENT METHOD CODE (see above chart): _____

Demand on your time: __ very little __ about right __ a lot

Do you suggest others use this method for measuring similar outcomes? __yes __no

How effective was this method? __not at all __somewhat __effective

In your opinion why was this method EFFECTIVE in measuring the student's achievements?

In your opinion why was this method NOT EFFECTIVE in measuring the student's achievements?

ATTACH ADDITIONAL SHEETS IF YOU USED MORE MEASUREMENT METHODS

General Education Pilot Project

D. Notes from Pilot Project meeting November 2, 2000

Frank Chavez (MAT 121) did a Chapter test (2-3). He distributed the test in different colors, students didn't seem to mind this.
Advantages: The class is 2 ½ hours so there were no test-taking problems. The success ratio was the same
Disadvantages: Should be a chapter-to-chapter test. It was too much material to cover in one exam.
Immediate effect: Will change to chapter tests in the future.

Letty David (ENG 102) brought several examples of assessment.

1) To demonstrate understanding of poetic devices, Letty placed a transparency copy of a painting on the overhead projector. Students then brainstormed inspirations. The next class their assignment was to bring back a poem. Followed up this activity immediately with the lecture on poetic design.
2) Two poems and short story activity. She integrated Jean Rukkila's idea of using art supplies to have the students make a "drawing" to show the themes. All but two students participated, and those two later demonstrated their ability in writing.

Stephen Franklin (GEO 131) uses an in-class worksheet that is set up like a grid to give students an idea of how things fit together in the "whole picture." This helps students to conceptualize the independent ideas/topics presented. This could work in other classes, such as Psychology, History, etc. It also helps combine 3 chapters of information.

To apply the information, the students were asked to put together a "proposal" as if they were going to solve a problem for a customer.

Multiple choice/essay quizzes are also given (total of 4 quizzes). These tools were developed last spring and seem to be working well.

Stephen has also taught with the Smartboard, and these seem to be going well.

Gerald Bacon (ANT 110) To demonstrate ability in critical thinking, Gerald's archeology class is asked to evaluate an "assemblage" after a field trip to the Elden Dig. At the next class, Gerald places a collection of items into an area of the classroom, set up to look like a dig. From that the students are asked to produce "field notes" just as if they were describing a real dig. This helped students demonstrate their ability and knowledge of the material. Other classes could use this activity and write narratives.

Marty Lara (HUM 242) shared a method for assessing outcomes that he had "never evaluated in this way before." Students present an oral report and they are assessed via observation. Students were offered a choice as to what interested them about certain topics, therefore making the experience more pleasant.

Michael Casey (ACC 101)

1) Informed students ahead of time, which turned out to be a little of a disadvantage because they were so worried about performing well on the assessment that they forfeited their preparation for the next subject.
2) Used multiple methods to assess the same outcome at about the same time in the semester (group activity, teacher observation of students on task, and a written exam)
3) Has used this method now for three semester and gets better at it each time.

General Education Pilot Project

E. Results from Tool Survey Fall 2000

Assessment of General Education Pilot Project Tool Survey Results for Fall 2001

Outcome Category	*Effective-ness*	*Process Time*	*Method Description*	*Course Number*	*Comments*
Aesthetic Awareness					
	Effective	Appropriate	Oral -discussion	ANT 110	Utilizing the terms in lecture/seminar. Hands-on objectives. Used film and readings.
Communicate concepts					
	Effective	Appropriate	Group activity - Computer project module	CIS 120	Students have questions, can be answered as they run into problems
	Effective	Appropriate	Oral - evaluation	PHI 101	Oral presentations, critical evaluations
	Effective	Appropriate	Test - crirerion reference	ECN 204	Highly recommend. Students enjoyed assignment which was to synthesis an academic journal article and related how they would benefit from that information. Students said it was difficult to read some of the math formulas.
	Effective	Appropriate	Written - focus paper	ECN 204	Video contained much of the terminology learned that would have been otherwise Greek to the students and they knew enough to engage in a discussion about how they felt regarding the proposed debate. Video from CSPAN tax debate
	Effective	Very little	Group activity	ENG 102	Communication skills
	Effective	Very little	Group activity	ENG 102	Communications skills, Brainstorm
	Effective	Very little	Presentation	ENG 102	Evaluation. Done during presentations, audience learned also.
	Effective	Very little	Presentation	ENG 102	Communications skills
	Effective	Very little	Test - crirerion reference	ECN 204	Recommended. Students were able to convey their interpretation about concept by drawing conclusions about what they see around them.
Cultural awareness					
	Effective	A lot	Test - crirerion reference	PHI 101	Students demonstrate their objective knowledge of ancient philosophy. Spend a lot of time on ancient topics
	Effective	A lot	Test - crirerion reference	PHI 101	2nd test shows the students continued progress. Critically thinking about philosophers
	Effective	Very little	Test - crirerion reference	PHI 101	Challenge for many students.
	Somewhat	Appropriate	Written - Journal	PHI 101	Writing on a weekly basics, students can explore their responses to the reading
Problem solving					
	Effective	Appropriate	Group activity	MAT 121	Worked in groups, prepared to present the solutions.

Assessment of General Education Pilot Project Tool Survey Results for Fall 2001

Outcome Category	*Effective-ness*	*Process Time*	*Method Description*	*Course Number*	*Comments*
	Effective	Appropriate	Group activity - Computer project module	CIS 120	Can answer questions while they run into problems as a group.
	Effective	Appropriate	In-class activity	GEO 131	Lab solving apply concepts and theories in precise and measurable objectives
	Effective	Appropriate	Oral - discussion	ANT 110	Utilizing the terms in lecture/seminar. Hands-on objectives. Used film and readings.
	Effective	Appropriate	Research	GEO 131	Apply lecture concepts in group activity. GIS exercise
	Effective	Appropriate	research - Field trip	ANT 110	Develop questions, evidence presented or not.
	Effective	Appropriate	research - Field trip	ANT 110	Develop questions of their own. Challenge an old paradigm.
	Effective	Appropriate	Test - crirerion reference	GEO 131	A base level consistent tool, to asses student comprehension of material three times during the length of the semester
	Effective	Appropriate	Test - crirerion reference	MAT 121	Problem solving good for math students. Test mimicked material.
	Effective	Appropriate	Test - crirerion reference	MAT 121	Problem solving questions very good for math students.
	Effective	Very little	observation	ECN 205	Excellent activity for students to gain applicable knowledge about concepts. Had groups develop demand schedules from personal traits and then graph the data points as a market and determine what price they would pay.
	Not at all	Appropriate	Group activity	MAT 121	Material builds upon itself. Problem solving
	Not at all	Appropriate	Test - crirerion reference	MAT 121	The material builds and problem solving questions are good for math students.
Quantitative evaluation					
	Effective	Appropriate	Debate	GEO 131	Awareness about student material was increased. Ability to communicate, analyze and synthesize information.
	Effective	Appropriate	Oral - discussion	GEO 131	Related theories and concepts of the world's climate. Used climatic control matrix worksheet
	Effective	Appropriate	Written proposal and presentation	GEO 131	Written assignments allowed students to demonstrate their ability to recognize socio-environmental
	Effective	Very little	Research - Field trips	GEO 131	Students able to see, investigate and describe classroom concepts as in the real world.
Writing composition					

Assessment of General Education Pilot Project Tool Survey Results for Fall 2001

Outcome Category	*Effective-ness*	*Process Time*	*Method Description*	*Course Number*	*Comments*
	Effective	A lot	Test - crirerion reference	ENG 101	Recommended but time intensive. Provided plenty of information about the student's capability. Peer and instructor conferencing should fall on different days A more reasonable word count needed. Used in-class activity to generate ideas and organization process.
	Effective	A lot	Test - crirerion reference	ENG 101	Recommended but time intensive. Provided plenty of information about the student's capability. Peer and instructor conferencing should fall on different days A more reasonable word count needed. Used in-class activity to generate ideas and organization process.
	Effective	A lot	Test - crirerion reference	ENG 101	Recommended but time intensive. Provided plenty of information about the student's capability. Peer and instructor conferencing should fall on different days A more reasonable word count needed. Used in-class activity to generate ideas and organization process.
	Effective	A lot	Written - activity	PHI 101	Concepts of human nature as a response to a film. A thesis statement, well-developed argument.
	Effective	Appropriate	Peer review	ENG 102	Reinforce what students leamed.
	Effective	Appropriate	Writing- activity	ENG 102	Developed writing skills for higher college courses.
	Effective	Appropriate	Written - activity	ENG 102	Evaluation guidelines. Did a writing workshop as a preface to the assignment.
	Effective	Appropriate	Written - activity	PHI 101	Students think about Buddhism as they develop thesis statements.
	Somewhat	Appropriate	Journal - class	PHI 101	Weekly writing basis, journal writing
	Somewhat	Appropriate	Test - crirerion reference	ENG 101	Complex assignment not recommended

Teaching and Learning Conference

F. Brochure and Presentation Schedule

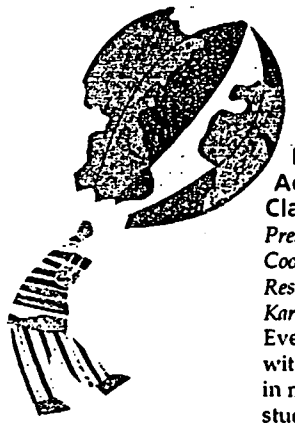
1st Annual Teaching & Learning Conference

Presentation Schedule

FLAGSTAFF CAMPUS

Coconino Community College

10 YEARS 1991-2001



9:00 a.m. to 10:30 a.m. — TUESDAY, AUGUST 22, 2000

Enhancing Accessibility in the Classroom – Rm 7

Presenter: Nancy Elliott, Coordinator, Disability Resources, CCC & Karen Salt, Educator, CCC

Every educator wrestles with the challenges faced in making sure that every student in the classroom has an optimum learning experience. This workshop will focus on methods for assuring that happens!

Using WebCT – Rm 8a

Presenter: Alane Matthews, Instructional Technology Specialist, CCC

Learn to use WebCT to enhance your curriculum or to teach online courses. In this hands-on workshop we will explore WebCT from a student's perspective and then create a short online or web enhanced course. We will explore WebCT features such as e-mail, electronic chats, online syllabi, and assessment tools. Enrollment limited to 20 participants.

The Whole Brain Market – Mind Mapping – Rm 22

Presenters: Dave Rudakewich, SBS Instructor, CCC and Sandra Dihlman, Adjunct SBS faculty, CCC

Discover the process and results of mind mapping and its impact on learning.

The $100,000 Question: How does Copyright affect you? – Rm 21

Presenter: Marcia Ostrowski; Program Coordinator, Informational Resources, CCC

Faculty and staff alike can benefit from the important information provided. Learn about Copyright, how it affects your teaching and workplace, and where to find more answers.

10:45 a.m. to 12:15 p.m. — TUESDAY, AUGUST 22, 2000

Panel Discussions – Rm 3

Facilitators: Michelle Metcalf and Steve Franklin, Adjunct Instructors, CCC

10:45 Retention Strategies
11:30 Surviving as an Adjunct Faculty at a Community College

Participate in the discussion and share your ideas for student and faculty retention!

Critical Thinking & Community Building in the College Classroom – Rm 7

Presenters: Ruth Foster, Area Coordinator, Developmental English, CCC, and Stephany Brown, Adjunct English Faculty, CCC

This dual topic workshop will have something for everybody, staff or faculty alike. Find out how to start off on the right foot and promote critical thinking skills right where you are!

The Power of PowerPoint – Rm 8a

Presenter: Alane Matthews, Instructional Technology Specialist, CCC

Learn to use the PowerPoint to create multimedia presentations, classroom handouts and overhead transparencies. This course is designed for beginners and enrollment is limited to 20 participants.

Training the Adult Learner for the InfoTech Workplace – Rm 22

Presenter: Dr. Pattie Odgers, CIS Instructor, CCC

Terms like virtual workers, and distance education are reshaping the nature of work in America and redefining how educators should be preparing the information technology worker for the new millennium workplace. The results of new research on trends, challenges, and delivery modalities from the presenter's newest textbook, *Administrative Office Management* will be presented.

Learning Outcomes, What are they? And how can I measure them? – Rm 21

Presenter: Barbara Eickmeyer, Assessment Project Leader, CCC

Find out about learning outcomes and ways to improve how to guide your students to their final destination, success in your class! Ideas for assessing students will also be presented.

12:30 to 1:15 p.m.
Round-table Discussions
Lunch provided by the CCC Foundation – Rm 22

Topics will be listed at tables for general discussion.
PLEASE RSVP to Lisa Chastain at (520) 527-1222 or (800) 350-7122 ext. 353

1:30 a.m. to 3:00 p.m. — TUESDAY, AUGUST 22, 2000

It's Not How Smart You Are, But How You Are Smart! * – Rm 21

Presenters: Jim Rhodes, Social & Behavioral Sciences Area Coordinator, CCC and Monica Baker, Occupational & Vocational Division Chair, CCC

Respecting differences by understanding that students learn in many ways. In this workshop, identify your own learning style and apply learning styles theory in the development of your course to meet the needs of the variety of learners that enter your classroom.

***will be repeated on Wednesday, Aug 23.**

How to write a memo people will read! – Rm 7: Campus communication for the 21st Century

Presenter: Jerry Baker, Interim VP Administrative Affairs, CCC

Learn how to use effective methods for written communication in the workplace. Participants will have practice opportunities and immediate feedback on-the-spot!

Using the SmartBoard* – Rm 22

Presenter: David Rudakewich, CCC,

This unique, interactive "white board" computer is one of the recent additions to our college classroom. Come observe how it is used and find out how you might be able to use it in your class.

***will be repeated on Wednesday, Aug 23.**

Teaching On line – A Panel Discussion – Rm 8a

Facilitators: Alan Peterson, Fine Arts Area Coordinator, CCC, Dr. Ron McFarland, Director for Distance Learning, CCC and Dr. Gerald Hughes, Professor of Sociology & Social Work, NAU

As the learner of the 21st Century changes, so must delivery methods for instruction. Questions will be answered on how faculty can prepare their courses for distance delivery.

Making a Rubric – Rm 3: How to measure what your students are learning

Presenter: Barbara Eickmeyer, Assessment Project Leader, CCC

Participants in this hands-on workshop will learn how to write a holistic measurement tool for their subject. Whether you teach art or zoology, this workshop will help you focus on telling your students what to expect and how they will be graded!

1:00 p.m. to 2:30 p.m. — WEDNESDAY, AUGUST 23, 2000

It's Not How Smart You Are, But How You Are Smart! (Repeat) – Rm 21
Presenters: Jim Rhodes, Social & Behavioral Sciences Area Coordinator, CCC and Monica Baker, Occupational & Vocational Division Chair, CCC
Respecting differences by understanding that students learn in many ways. In this workshop, identify your own learning style and apply learning styles theory in the development of your course to meet the needs of the variety of learners that enter your classroom.

The ESL Student, What you need to know – Rm 7
Presenter: Holly Franquet, Adjunct Spanish Faculty, CCC
Find out the challenges faced by a student whose first language is not English. How can educators help these learners to overcome the hurdles in order to gain success!

Deep Learning: The Paradigm Shift in Higher Education – Rm 3
Presenter: Mary Feiler, Learning Specialist, CCC
Do teachers teach more when they preach less? In this collaborative session, you'll find out why and how educators are integrating active learning in their classrooms. Specific strategies will be shared and demonstrated by guest speakers and the audience.

Using the SmartBoard (Repeat) – Rm 22
Presenter: David Rudakewich, CCC
This unique, interactive "white board" computer is one of the recent additions to our college classroom. Come observe how it is used and find out how you might be able to use it in your class.

Write a Syllabus in less than an hour! – Rm 8a
Facilitator: Kate Kozak, Interim Arts & Sciences Division Chair, CCC
Here's your chance to write a hassle-free syllabus that your students will read and USE! Other than having to make copies, you'll be ready to go after this workshop! Materials will be provided. Come early, seating is limited to 25!

2:45 p.m. to 4:15 p.m. — WEDNESDAY, AUGUST 23, 2000

How to propose a New Course at CCC – Rm 3
Presenter: Maxie Inigo, Curriculum Committee Chair, CCC
Some of the best ideas for courses never make it to the curriculum committee for lack of information! Learn how to propose a new course, from inception to implementation!

How to write a Test (or two!) – Rm 7
Presenter: Barbara Eickmeyer, Assessment Project Leader, CCC
One of the hardest things to do is write a test that actually measures what students are learning, while providing a learning experience at the same time. Find out different methods for writing a good test that will reap results!

True Colors – Rm 21
Presenter: Frannie Hill, NAU
Knowing your personality "colors" will help in your daily communication with people. This unique workshop will enhance your sensitivity to workplace and classroom interaction.

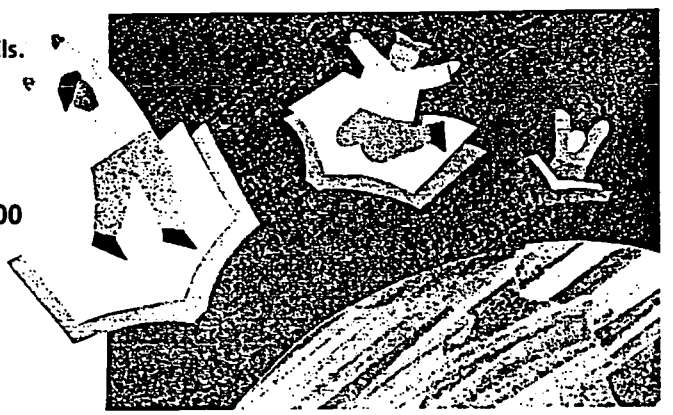
Popular Repeat Sessions – Rm 8a & 22
To be determined by participant input.

4:45 p.m. to 5:45 p.m. — WEDNESDAY, AUGUST 23, 2000

Vocational / Occupational Area Faculty Meetings – Rooms TBA

Arts & Sciences Area Faculty Meetings – Rooms TBA

Contact your area coordinator for details.



6:00 p.m. to 8:00 p.m. — WEDNESDAY, AUGUST 23, 2000

6:00 p.m. Convocation Dinner at Coconino High School
2801 N. Izabel Street.
All faculty and staff are welcome.

Convocation Address 7:00 p.m.
Guest speaker: Dr. Thomas S. Jordan, President CCC
President Jordan will address faculty and staff on the college's vision for the upcoming academic year.

Seating limited, RSVP to Lisa Chastain at (520) 527-1222 or (800) 350-7122 ext. 353.

1st Annual Teaching & Learning Conference

FLAGSTAFF CAMPUS

SCHEDULE AT A GLANCE

Tues, August 22	Rm 3	Rm 7	Rm 8a	Rm 21	Rm 22
9:00 -10:30	Check in & Registration room	Enhancing Accessibility in the class-room *Nancy Elliott & Karen Salt*	Using Web CT *Alane Matthews*	The $100,000 Question, How does copyright affect you? *Marcia Ostrowski*	The Whole Brain Market – Mind mapping *Dave Rudakewich & Sandra Dihlman*
10:45 -12:15	10:45 Retention Strategies & 11:30 Surviving as an Adjunct Faculty at CCC Panel Discussion *Michelle Metcalf & Steve Franklin*	Critical Thinking & Community Building in the classroom *Ruth Foster & Stephany Brown*	The Power of PowerPoint *Alane Matthews*	Learning Outcomes – What are they and how can I measure them? *Barb Eickmeyer*	Training the Adult Learner for the InfoTech Workplace *Dr. Pattie Odgers* *ends at 12:00
12:30 -1:15	**Roundtable Discussions- Rm 22** **Lunch provided by the CCC Foundation** **Topics will be listed at each table for general discussion.** **PLEASE RSVP to Lisa Chastain at (520) 527-1222 or (800) 350-7122 ext. 353**				
1:30 -3:00	Making a Rubric – How to measure what your students are learning (limited to 24) *Barb Eickmeyer*	How to write a memo that people will read! Campus Communication *Jerry Baker*	Teaching Online – A panel discussion *Alan Peterson, Dr. Ron McFarland & Dr. Gerald Hughes*	Learning Styles & Multiple Intelligences (limited to 30) *Jim Rhodes & Monica Baker*	Using the SmartBoard (limited to 25) *Dave Rudakewich*

7:00 p.m.	**Convocation Address – Dr. Thomas S. Jordan**				

For more information contact Lisa Chastain @ Coconino Community College, (520) 527-1222 or (800) 350-7122 ext 353. Please contact Human Resources ext 268, by August 14th, if you will need an accommodation to participate in any CCC sponsored activity.

General Education Student Outcomes

G. General Education Student Outcomes as approved by College Faculty February, 2001

GENERAL EDUCATION STUDENT OUTCOMES
COCONINO COMMUNITY COLLEGE

COMMUNICATION SKILLS
Conveying of ideas using one or more methods of expression (written, oral, signed)

1. Present ideas developed from diverse sources and points of view with consideration of target audience
2. Demonstrate communication process through idea generation, organization, drafting, revision, editing, and presentation
3. Participate in and contribute to collaborative groups
4. Construct logical, coherent, well-supported arguments
5. Employ syntax, usage, grammar, punctuation, terminology, and spelling appropriate to academic discipline and the professional world
6. Demonstrate listening / interpretive skills in order to participate in communications and human exchange.

THINKING SKILLS
Using a variety of inquiry methods, resources, and reasoning skills that support and promote lifelong learning.

1. Use appropriate method of inquiry to identify, formulate, and analyze a current or historical problem/question (may include recognizing significant components, collecting and synthesizing information, evaluating and selecting solution(s), applying and defending solution(s)
2. Translate quantifiable problems into mathematical terms and solve these problems using mathematical or statistical operations
3. Interpret graphical representations (such as charts, photos, artifacts) in order to draw appropriate conclusions
4. Recognize strengths and weaknesses in arguments
5. Demonstrate observational and experimental skills to use the scientific method to test hypotheses and formulate logical deductions.
6. Understand the uses of theories and models as applied in an area of study
7. Develop creative thinking skills for application in problem solving
8. Demonstrate a working knowledge of a technological application in an area of study

DIVERSITY AND GLOBAL PERSPECTIVE
An understanding and appreciation of diverse cultures, values, beliefs, and historical perspectives.

1. Recognize the diversity of humanity at the local, regional and global levels
2. Synthesize information about needs, concerns and contributions of different cultures within society
3. Identify the influence of cultural and ethnic backgrounds on individual and group attitudes and values
4. Link cultural perspectives, practices, and interactions with the societal and physical environment from which they arose
5. Explain the importance of cross-cultural influences on physical, cultural and spiritual heritage
6. Relate and explain the connections between past and present events and/or issues

GENERAL EDUCATION STUDENT OUTCOMES
COCONINO COMMUNITY COLLEGE

AESTHETIC PERSPECTIVE

A better understanding, appreciation, and global application of the arts.

1. Analyze and evaluate literary, visual, or performing arts using discipline-specific approaches and criteria
2. Reflect on personal responses to aesthetic experiences
3. Incorporate aesthetic reflection into discipline-specific activities

ETHICAL AND CIVIL VALUES

A better understanding of oneself and others in order to clarify individual and societal responsibilities, needs, and values

1. Identify and assess community needs and the responsibility to balance individual and societal needs
2. Display responsibility and integrity in one's choices and actions
3. Integrate knowledge in order to establish an ethical position on an issue and defend it with logical arguments
4. Develop an appreciation of education and lifelong learning
5. Understand social values and analyze their implications for the individual, community, society, and world
6. Recognize the individual's responsibility to continue the exploration of the changing world and one's role in it

General Education Student Outcomes

H. March 23, 2001 Work Session Report

Assessment of General Education
Curriculum Revision Day
March 23, 2001

Participants (21 total):

Jerry Baker (Division Chair)
Bryan Bates
Lonny Born (Associate Faculty)
Barbara Cress
Mike Devoley (temp full time)
Barbara Eickmeyer
Ruth Foster
Lloyd H. Hammonds (Dean, Page Campus)
Paul Holbrook
Maxie Inigo
Jennifer Jameson (temp full time)
Kate Kozak
Marty Lara
Alan Petersen
Jeff Rhode
Jim Rhodes
Dave Rudakewich
Suzan Simmons (Curriculum Coordinator)
Kirsten Squint
Vennie White
Pete Yanka (Advising rep)

Purpose of the work session

The primary purpose of the work session was for faculty to review general education course outlines and fill out a checklist that contained the college's general education student outcomes. The outcomes were written through a collaborative effort of faculty over the last three semesters and finalized in February 2001.

There are 92 courses listed in the college catalog in the general education core. We anticipated that perhaps a third of the outlines would be reviewed at the work session, however this was a generous estimate. The day of the work session, we were very pleased with the energetic response from faculty. Their enthusiasm served at motivation to get the job done and everyone got to work right away.

At the Work session

41 General Education outlines reviewed and/or modified at the work session
6 Non-General Education outlines modified at the work session

Program level review of the General Education core curriculum took place when we compared the course outlines to the new General Education program outcomes.

For the first time that the General Education program outcomes were "put through their paces" and applied to the curriculum.

At first glance, we discovered that the course level and program level outcomes in General Education are very well meshed!!

Unanticipated (but welcome!) Results

Faculty made modifications to course outlines to better reflect what is actually happening in the classroom.

Groups of faculty really discussed their programs in the process of completing the General Education checklist. A spirit of collegiality and collaboration prevailed.

Gaps and errors in the curriculum archives were detected.

Assessment of General Education
Curriculum Revision Day
March 23, 2001

Effective discussion with administrators took place regarding the future of General Education assessment and of student academic achievement in general.

A representative from Advising attended the work session and was able to gain knowledge of how the assessment of basic skills has a direct impact on student outcomes in General Education. Lloyd Hammonds, Dean of the Page Campus, shared a model for "Learner Readiness" that could be useful to our assessment program development.

It worked well for non General Education courses as well. Faculty members worked on non-General Education courses because they had time.

Ruth Foster commented, *Though I didn't work on General Education outlines Friday, the meeting gave me a chance to work with Paul [Holbrook] to complete a project we started months ago - combining ENG 135 with BUS 111 and ENG 136 with BUS 204 and retiring the two English classes. It really helped that you had all the forms there and the personnel to answer our questions. Without it, we would not have gotten around to finishing it this term, and if we had, we would have had to run around getting info and forms. In addition, seeing everyone together gave me a chance to discuss unrelated pressing business, especially with Lloyd.*

Other comments by participants:

Marty Lara, *This is one of those "must-be-done" things. I was shocked to discover that some outlines had not been updated in some time.*

Jim Rhodes, *This process allowed us to set aside a time to work on curriculum and discuss our programs. It was good to have it on campus. Perhaps earlier in the semester might be better.*

Vennie White, *It was so helpful in terms of seeing what we needed to do to be sure that what occurs in the classroom is reflected on the course outline and vice-versa. The process led to positive conversation about articulation and transfer of English courses.*

Jeff Rhode, *That was easy!*

Jerry Baker, *Very productive! I was impressed with how much participation there was from the temporary full time faculty. I also became more aware of faculty who demonstrated leadership in curriculum management and assessment.*

Considerations

This was an effective activity for general education program level review. We recommend a similar method for assessing programs in other areas.

This type of process should take place on an annual basis in order to ensure that curriculum is current and complete.

The college needs to determine how and where the results of program level assessment should be archived.

General Education Student Outcomes

H-1 Curriculum checklist for General Education Student Outcomes

GENERAL EDUCATION STUDENT OUTCOMES CHECKLIST

Course Outline Checklist for _____
(course prefix and name)

Place a check or **X** beside each outcome addressed by this course. Then list all appropriate **Content** numbers (E.4) or **Outcome** numbers (D.2) from the Course Outline that reflect each marked outcome.

X		Content Items	Outcome Items
A. Communication Skills - Conveying of ideas using one or more methods of expression (written, oral, signed)			
	1. Present ideas developed from diverse sources and points of view with consideration of target audience		
	2. Demonstrate communication process through idea generation, organization, drafting, revision, editing, and presentation		
	3. Participate in and contribute to collaborative groups		
	4. Construct logical, coherent, well-supported arguments		
	5. Employ syntax, usage, grammar, punctuation, terminology, and spelling appropriate to academic discipline and the professional world		
	6. Demonstrate listening / interpretive skills in order to participate in communications and human exchange.		
B. Thinking Skills - Using a variety of inquiry methods, resources, and reasoning skills that support and promote lifelong learning.			
	1. Use appropriate method of inquire to identify, formulate, and analyze a current or historical problem/question (may include recognizing significant components, collecting and synthesizing information, evaluating and selecting solution(s), applying and defending solution(s)		
	2. Translate quantifiable problems into mathematical terms and solve these problems using mathematical or statistical operations		
	3. Interpret graphical representations (such as charts, photos, artifacts) in order to draw appropriate conclusions		
	4. Recognize strengths and weaknesses in arguments		
	5. Demonstrate observational and experimental skills to use the scientific method to test hypotheses and formulate logical deductions.		
	6. Understand the uses of theories and models as applied in an area of study		
	7. Develop creative thinking skills for application in problem solving		
	8. Demonstrate a working knowledge of a technological application in an area of study		
C. Diversity and Global Perspective - An understanding and appreciation of diverse cultures, values, beliefs, and historical perspectives.			
	1. Recognize the diversity of humanity at the local, regional and global levels		
	2. Synthesize information about needs, concerns and contributions of different cultures within society		
	3. Identify the influence of cultural and ethnic backgrounds on individual and group attitudes and values		
	4. Link cultural perspectives, practices, and interactions with the societal and physical environment from which they arose		
	5. Explain the importance of cross-cultural influences on physical, cultural and spiritual heritage		
	6. Relate and explain the connections between past and present events and/or issues		
D. Aesthetic Perspective - A better understanding, appreciation, and global application of the arts.			
	1. Analyze and evaluate literary, visual, or performing arts using discipline-specific approaches and criteria		
	2. Reflect on personal responses to aesthetic experiences		
	3. Incorporate aesthetic reflection into discipline-specific activities		
E. Ethical and Civil Values - A better understanding of oneself and others in order to clarify individual and societal responsibilities, needs, and values.			
	1. Identify and assess community needs and the responsibility to balance individual and societal needs		
	2. Display responsibility and integrity in one's choices and actions		
	3. Integrate knowledge in order to establish an ethical position on an issue and defend it with logical arguments		
	4. Develop an appreciation of education and lifelong learning		
	5. Understand social values and analyze their implications for the individual, community, society, and world		
	6. Recognize the individual's responsibility to continue the exploration of the changing world and one's role in it

K. Assessment of General Education Report 1999-2000

A Faculty Report on:

ASSESSMENT OF GENERAL EDUCATION AT COCONINO COMMUNITY COLLEGE

1999- 2000

Written by Barbara Eickmeyer

Contents:

Purpose and Overview of the Project

In the fall semester of 1999, the Principal Committee for Institutional Effectiveness (PIE) approved the continuation of the General Education Assessment Pilot Project. This project began in 1996, but was put on hold due to personnel constraints. The Vice President for Educational Services authorized a full-time faculty member to lead the 1999-2000 project with the financial support of PIE.

The purpose of the project was twofold: first, to measure student achievement of course outcomes throughout the semester and second, to explore a cost-effective and meaningful method for reporting and documenting student academic achievement at Coconino Community College (CCC). Participants were asked to provide input regarding an "outcomes assessment form" and its usefulness for reporting student achievement.

As the fall study was under way, it became evident that the pilot project should continue and expand into a focused effort to write outcomes for General Education. The spring semester was designed with more specific goals and resulted in a concerted effort towards completion of the pilot project, as well as writing program outcomes for General Education at the college.

The project was met with considerable support from administration, full-time and adjunct faculty. During the two semesters, a total of seven full-time and fourteen associate faculty participated in the project. The three full-time faculty who coordinated the project were allocated a total of thirteen released hours. Adjunct faculty were paid by PIE for their participation, and other full-time faculty who participated received the benefits of satisfaction and experience. Although an invitation was extended through the Dean of the Page Campus, no faculty from Page participated.

What we did – Fall 1999

The participants agreed to meet on a monthly basis to discuss assessment methods and the challenges they were facing in this project. They were encouraged to suggest modifications to the outcomes assessment form and to explore effective methods for assessing their students.

Participants from different disciplines experienced a wide variety of challenges in determining outcomes assessment activities and measures. Assessment of outcomes became more "automatic" as a result of participation in this study, and teaching methodology was directly improved. Faculty found it difficult and time consuming to isolate and measure certain outcomes in their courses. One of the most important results of the fall semester study was that all who participated agreed that it should continue for at least another semester.

Although the main purpose for the study was to explore methods for measuring course outcomes and focus on process and mechanisms, it is interesting to note the results of that first semester. During the fall 1999 semester, assessment of outcomes was reported in the following Gen Ed courses: BIO 100, CIS 120, ECN 204, ECN 205, HUM 241, MAT 151, PHI 101, SOC 101, and SPA 101. Recognizing the limited validity of these initial results, we were pleased to discover that, of the total students assessed in the fall courses, 81% met the minimum measurement of outcomes (see Attachment A).

What we did – Spring 2000

In the spring 2000 semester, we continued the project in a similar manner, however we took a different approach to the process by teaming faculty together with similar courses. For example, math instructors teamed together to measure similar course outcomes at varying levels. The purpose was to explore how course level assessment methodology might be used to measure program level outcomes. Instructors reported that this "teaming" idea worked well for researching assessment methods. Some instructors used the same instruments for measuring similar outcomes (e.g. Accounting and Macroeconomics), while others worked together to create instruments that measured the same outcomes at varying levels in their courses (e.g. reading for Spanish 102 and 201).

During the spring 2000 semester, assessment of outcomes was reported in the following Gen Ed courses: ACC 101, ANT 110, ECN 205, ENG 102, GEO 131(2 sections), HUM 241/242, MAT 121/151, PSY 101 (2 sections), and SPA 102/201 (see Attachment B). Again, we recognize the limited validity of these results, however it was interesting to note that, of the total students assessed in the spring courses, 82% met the minimum measurement of outcomes.

Another direct result of this study was the development of faculty training workshops on assessment. This study made us aware that there was a strong need for faculty to learn how to assess student outcomes effectively, so we set up two training workshops for February, 2000. Twenty-one adjunct faculty participated in these paid training opportunities.

What we learned

Perhaps the most important result of this study was that we became acutely aware of the important need to write outcomes for the General Education program at the college as soon as

possible. While Joan Zumwalt had suggested this in the *Assessment of General Education Curriculum (1997)* publication, it was something that the faculty had not prioritized as the next step in assessment of student outcomes. During the process of this study, it became evident that in order for faculty to report student performance on course level outcomes, they would need more global common outcomes that related directly to all general education courses at the college. It wasn't enough, nor was it feasible, to begin reporting our student academic achievement solely on the results from measurement of course level outcomes. We needed to ask ourselves, "*What should the Gen Ed completer 'look like' at the end of our program?*" A proposal was accepted by the Vice President for Educational Services (Academic Affairs) for a three-semester assessment project, from spring 2000 to spring 2001, to write the outcomes for General Education with the faculty.

With a review of the literature, we collected a variety of sample outcome statements from colleges around the country. Then, a group of 15 faculty and 3 administrators met off-campus in a six hour work session to determine characteristics that would best reflect the college's general education program outcomes. They worked carefully to link the outcomes to the college mission, purpose statement, and general education values and criteria. This productive meeting yielded a preliminary foundation of program competencies that a student could anticipate upon completion of our general education program. The group then brought the results back to the entire faculty for further input and suggestions. At the final College Instructional Team (faculty) meeting in April, 2000, the faculty selected representatives to continue this important process during the summer.

This study was effective because of strong administrative support for the proposal and faculty involvement. We also learned that it would take time and effort for the college to have a viable, useful, and effective assessment plan. An assessment program must include a centralized management, faculty participation, financial support and administrative assistance. This project demonstrated that each component is necessary for success.

A final meeting was convened with the Vice President for Educational Services (Academic Affairs) and the faculty coordinators for the assessment project in May, 2000. His recommendations for priority in the 2000-2001 academic year included: finalizing the General Education Outcomes, determining appropriate measurement tools, and writing outcomes for programs other than General Education.

The Future

We acknowledge that training and development is a vital ingredient for faculty to have the necessary knowledge for this process. Training and professional development opportunities will be made available to faculty using PIE and Title III grant monies. A collaborative effort between the college president, the director for the Training and Development Center and the assessment

project coordinator has resulted in the college's first annual *Teaching and Learning Conference.* This will be a two-day conference prior to the start of the semester, dedicated to providing professional development opportunities to faculty and staff. There will be several work sessions available on assessment techniques and writing outcomes, as well as other training for improving teaching and learning.

The General Education Assessment Pilot Project will continue through the fall 2000 semester. The study will focus on determining effective measurement tools for course outcomes. Faculty who participated during fall/spring 1999-2001 will be asked to be a part of this final semester project. Once again, there will be three full-time faculty whose semester load will include assessment activities.

By the end of the fall semester, faculty will complete the General Education Outcomes for Coconino Community College. We anticipate a "domino effect" of program outcomes for degrees and certificates will immediately follow in the process. It is reasonable to anticipate that outcomes for all degrees, certificates and General Education will be in place by the end of the 2001 spring semester.

We also anticipate that the spring 2001 semester will be dedicated to exploring assessment instruments for the General Education Outcomes and training faculty in effective assessment of student academic achievement. The most important step in the process will be the implementation of the instruments for use in assessing student achievement of academic outcomes. We are committed to adopting the instrument(s) that will best measure the student outcomes identified in our degrees, certificates and General Education program. These should be ready for initial piloting or implementation in the fall 2001 semester.

At the culmination of the three-semester assessment project, the coordinator will meet with the Vice President for Educational Services (Academic Affairs) to report on the status of the project and make recommendations to keep the momentum of assessment of student academic achievement at the forefront of the institution's priorities. The journey is far from over, but the goal is within reach.

Develop skills in analyzing and synthesizing information	Essay	9	8-10	8	89%
		10	15	9	90%
Interpretation, and evaluation of evidence	Essay	9	8-10	8	89%
		10	15	8	80%
Successful completion of the writing component	Essay	14	8-10	14	100%
		14	15	14	100%
HUM 242					
Emphasize the gathering, interpretation, and evaluation of evidence		11	3	9	82%
		17	8	13	76%
		17	14	14	82%
Develop skills in analyzing and synthesizing information		11	3	6	55%
		17	8	12	71%
		17	14	10	59%
Successful completion of the writing component		17	14	12	71%
MAT 121 / 151					
Demonstrate graphing linear equations	Problems	31	11	18	58%
Solve systems of equations graphically & quantitatively & check solutions	Problems	31	11	16	52%
	Problems	35	16	26	74%
Simplify / solve rational, and radical expression & equations	Problems	35	16	21	60%
Develop an understanding of logarithmic operations	Problems	35	16	23	66%

Course / Outcome	Assessment Method	Number of students assessed	Period of assessment by semester week	Students who met the requirements	Percentage of students meeting the minimum measurement
PSY 101 SEC 3 & 4					
Concepts, theories, and research methods	Instructor test	51	4	29	57%
	oral presentations	19	8	18	95%
	Essay	50	13	47	94%
Emotions, motivation, memory and learning	Quiz	51	11	43	84%
	oral presentations	17	11	16	94%
	Instructor test	51	12	39	76%
Abnormal personalities and therapies	Quiz	50	15	39	78%
	oral presentations	15	15	14	93%
	Instructor test	49	16	30	61%
SPA 102					
Interpret written Spanish from texts that are linguistically non-complex	Pre/Post test	20	1	12	60%
	Instructor test	19	5	15	79%
	Instructor test	16	16	16	100%
Initiate and respond verbally to uncomplicated, basic communicative tasks and social situations	Pre/Post test	20	1	14	70%
	Oral examination	20	3	19	95%
	Pre/Post test	16	15	16	100%
Demonstrate comprehension of sentence-length statements or questions in a limited number of content areas	Pre/Post test	20	1	19	95%
	Instructor test	17	10	14	82%
	Oral examination	16	15	14	88%
SPA 201					
Interpret simple connected text	Verbal response	7	8-10	7	100%
	Verbal response	7	8-10	6	86%
	Verbal response	7	16	7	100%
	Verbal response	7	16	7	100%
Demonstrate increased comprehension of conversational discourse on a number of topics	Instructor test	7	16	7	100%
Initiate, sustain and close a general conversation utilizing learned grammatical strategies	Instructor test	7	9	6	86%
	Instructor test	7	16	7	100%
	Instructor test	7	8-10	6	86%
Totals		**1722**		**1408**	**82%**

REPRODUCTION RELEASE

(Specific Document)

I. DOCUMENT IDENTIFICATION:

Title: COCONINO COMMUNITY COLLEGE
A FACULTY REPORT ON: ASSESSMENT OF GENERAL EDUCATION 2000-2001

Author(s): Barbara Eickmeyer / Coconino Community College

Corporate Source: Coconino Community College
PO Box 80,000
3000 N. Fourth St.
FLAGSTAFF AZ 86003-8000

Publication Date: May 2001

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level 1 documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

1

Level 1 ☑

Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g., electronic) *and* paper copy.

The sample sticker shown below will be affixed to all Level 2A documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE, AND IN ELECTRONIC MEDIA FOR ERIC COLLECTION SUBSCRIBERS ONLY, HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

2A

Level 2A ☐

Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only

The sample sticker shown below will be affixed to all Level 2B documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE ONLY HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

2B

Level 2B ☐

Check here for Level 2B release, permitting reproduction and dissemination in microfiche only

Documents will be processed as indicated provided reproduction quality permits.
If permission to reproduce is granted, but no box is checked, documents will be processed at Level 1.

I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.

A Reminder from the ERIC Clearinghouse for Community Colleges. . . .

Please submit your community college - related documents to the ERIC database. We accept a wide range of kinds of materials, including:

- **Reports and Manuals**
- **Presentation Papers**
- **Curricular Materials**

The main stipulations are that the document must have substantive content and narrative text (not only tables or copies of slides) and must be 5 pages in length.

Please fill out the release form on the opposite side of this flyer and mail your documents to:
